PHYSIOLOGICAL NMR SPECTROSCOPY:
FROM ISOLATED CELLS TO MAN[a]

Editor and Conference Organizer
SHEILA M. COHEN

CONTENTS

Introduction. *By* SHEILA M. COHEN x

NMR: Physical Principles and Current Status as a Biomedical Technique. *By* EDWIN D. BECKER and CHERIE L. FISK 1

Contributions of ^{13}C and ^{1}H NMR to Physiological Control. *By* ROBERT G. SHULMAN 10

NMR Studies of Methanogens: What Good Is a Cyclic Pyrophosphate? *By* MARY F. ROBERTS, JEREMY N. S. EVANS, CYNTHIA J. TOLMAN, and DANIEL P. RALEIGH 16

Intracellular pH as Measured by ^{19}F NMR. *By* CAROL J. DEUTSCH and JUNE S. TAYLOR 33

NMR Investigations of Cellular Energy Metabolism. *By* ROBERT S. BALABAN, ALAN KORETSKY, and LAWRENCE KATZ 48

Cerebral Lactate Elevation by Electroshock: A ^{1}H Magnetic Resonance Study. *By* JAMES W. PRICHARD, OGNEN A. C. PETROFF, TAKASHI OGINO, and ROBERT G. SHULMAN 54

In Situ Brain Metabolism. *By* THOMAS L. JAMES, LEE-HONG CHANG, WIL CHEW, RICARDO GONZALEZ-MENDEZ, LAWRENCE LITT, PAMELA MILLS, MICHAEL MOSELEY, BRYAN PEREIRA, DANIEL I. SESSLER, and PHILIP R. WEINSTEIN 64

Combined ^{1}H and ^{31}P NMR Studies of the Rat Brain *in Vivo:* Effects of Altered Intracellular pH on Metabolism. *By* K. L. BEHAR, D. L. ROTHMAN, S. M. FITZPATRICK, H. P. HETHERINGTON, and R. G. SHULMAN 81

Deuterium Magnetic Resonance *in Vivo:* The Measurement of Blood Flow and Tissue Perfusion. *By* JOSEPH J. H. ACKERMAN, COLEEN S. EWY, SEONG-GI KIM, and ROBERT A. SHALWITZ 89

NMR Studies of Renal Metabolism: Regulation of Renal Function by ATP and pH. *By* NANCY SHINE, WILLIAM ADAM, JIAN AI XUAN, and MICHAEL W. WEINER 99

[a]This volume is the result of a conference entitled Physiological NMR Spectroscopy: From Isolated Cells to Man, which was held by the New York Academy of Sciences in New York City on September 24–26, 1986.

^{13}C and ^{31}P NMR Studies of Hepatic Metabolism in Two Experimental Models of Diabetes. *By* SHEILA M. COHEN 109

Transmembrane Ion Pumping: High Resolution Cation NMR Spectroscopy. *By* CHARLES S. SPRINGER, JR. 130

A Comparison of Intracellular Sodium Ion Concentrations in Neoplastic and Nonneoplastic Human Tissue Using ^{23}Na NMR Spectroscopy. *By* MELISSA S. LIEBLING and RAJ K. GUPTA 149

NMR Studies of Phosphate Uptake and Storage in Plant Cells and Algae. *By* HANS J. VOGEL 164

Nuclear Magnetic Resonance Spectroscopy in the Cancer Clinic. *By* JOHN R. GRIFFITHS 176

Monitoring Cancer Therapy by NMR Spectroscopy. *By* J. R. GRIFFITHS, Z. BHUJWALLA, R. C. COOMBES, R. J. MAXWELL, C. J. MIDWOOD, R. J. MORGAN, A. H. W. NIAS, P. PERRY, M. PRIOR, R. A. PRYSOR-JONES, L. M. RODRIGUES, M. STUBBS, and G. M. TOZER 183

^{31}P and ^{1}H NMR Spectroscopy of Tumors *in Vivo:* Untreated Growth and Response to Chemotherapy. *By* JANNA P. WEHRLE, SHI-JIANG LI, S. SUNDER RAJAN, R. GRANT STEEN, and JERRY D. GLICKSON 200

Multinuclear NMR Study of the Metabolism of Drug-Sensitive and Drug-Resistant Human Breast Cancer Cells. *By* JACK S. COHEN and ROBBE C. LYON 216

Phosphorylated Metabolites in Tumors, Tissues, and Cell Lines. *By* T. R. BROWN, R. A. GRAHAM, B. S. SZWERGOLD, W. J. THOMA, and R. A. MEYER 229

Some Recent Applications of ^{1}H NMR Spectroscopy *in Vivo*. *By* DAVID G. GADIAN, EDWARD PROCTOR, and STEPHEN R. WILLIAMS 241

In Vivo NMR Studies of Glycogen Metabolism: A New Look at a Time Honored Problem. *By* EUGENE J. BARRETT, WILLIAM A. PETIT, and MAREN R. LAUGHLIN 251

^{31}P NMR Studies of the Kinetics and Regulation of Oxidative Phosphorylation in the Intact Myocardium. *By* K. UGURBIL, P. B. KINGSLEY-HICKMAN, E. Y. SAKO, S. ZIMMER, P. MOHANAKRISHNAN, P. M. L. ROBITAILLE, W. J. THOMA, A. JOHNSON, J. E. FOKER, and A. H. L. FROM 265

NMR Spectroscopy for Clinical Medicine Animal Models and Clinical Examples. *By* MICHAEL W. WEINER 287

The Biochemistry of Human Diseases as Studied by ^{31}P NMR in Man and Animal Models. *By* GEORGE K. RADDA, ROLF D. OBERHAENSLI, and DORIS J. TAYLOR 300

An Approach to the Problem of Metabolic Heterogeneity in Brain: Ischemia and Reflow after Ischemia. *By* B. CHANCE, J. S. LEIGH, JR., S. NIOKA, T. SINWELL, D. YOUNKIN, and D. SMITH 309

Measurement of Phosphocreatine to ATP Ratio in Normal and Diseased Human Heart by ^{31}P Magnetic Resonance Spectroscopy Using Rotating Frame-Depth Selection Technique. *By* B. RAJAGOPALAN, M. J. BLACKLEDGE, W. J. MCKENNA, N. BOLAS, and G. K. RADDA 321

Spatial Localization in NMR Spectroscopy *in Vivo*. *By* PAUL A. BOTTOMLEY 333

Spatially Resolved ^{31}P NMR Spectroscopy of Organs in Animal Models and Man. *By* PETER STYLES, MARTIN J. BLACKLEDGE, CHRIT T. W. MOONEN, and GEORGE K. RADDA 349

Non-Invasive Localized NMR Spectroscopy *in Vivo:* Volume Selective Excitation. *By* WALTER P. AUE 360

Spatial Localization by Rotating Frame Techniques. *By* D. I. HOULT, C.-N. CHEN, and L. K. HEDGES 366

Volume Selection Using Gradients and Selective Pulses. *By* R. J. ORDIDGE, P. MANSFIELD, J. A. B. LOHMAN, and S. B. PRIME 376

Image-Guided Localized ^{1}H and ^{31}P NMR Spectroscopy of Humans. *By* JAN A. DEN HOLLANDER and PETER R. LUYTEN 386

POSTER PAPERS

NMR Microscopic Studies of Eyes and Tumors with Histological Correlation. *By* JAMES B. AGUAYO, STEPHEN J. BLACKBAND, JANNA P. WEHRLE, J. D. GLICKSON, and MARK A. MATTINGLY 399

Decoupler Heating in Phantoms at 1.9 T Using Surface Coils. *By* JEFFRY R. ALGER 414

^{31}P NMR Evaluation of *in Vivo* Renal Ischemia and Reperfusion Injury in Rabbits and Dogs. *By* LOUIS F. MARTIN, DAVID M. FEHR, ANASTASIUS O. PETER, JOSEPH B. SANFORD, IDA N. GORMAN, and RICHARD W. BRIGGS ... 417

^{31}P-NMR in the Differential Diagnosis of Acute Renal Failure. *By* LAURENCE CHAN and JOSEPH I. SHAPIRO 420

Heart Transplantation to Groin: A Model for NMR Study in the Rat. *By* L. CHAN, J. I. SHAPIRO, C. E. HAUG, and R. WEIL III 423

An Examination of the Specificity of *in Vivo* ^{31}P MRS Adriamycin Response Markers. *By* J. L. EVELHOCH, N. A. KELLER, and T. H. CORBETT 426

A Saturable Halothane Binding Site in Rat Brain Described by ^{19}F-NMR. *By* ALEX S. EVERS and D. ANDRÉ D'AVIGNON 429

Cytosolic Inorganic Phosphate Does Not Appear To Regulate the Contractile Response in the Intact Rat Heart. *By* ARTHUR H. L. FROM, STEVAN D. ZIMMER, MARC A. PETEIN, STEPHEN P. MICHURSKI, and KAMIL UGURBIL 432

Proton NMR *in Vivo* Imaging: A Tool for Studying Embryo Development of Small Organisms. *By* JOOST A. B. LOHMAN and GEORGE GASSNER 435

Comparison of Intra- and Extracellular Na^+ of Erythrocytes Using ^{23}Na NMR in the Absence of Shift Reagent. *By* L. S. OKERLUND and R. J. GILLIES 437

^{31}P NMR Studies of Vascular Smooth Muscle from Rabbit Thoracic Aorta: Oxidation of Glucose but not of Fatty Acid Is Required for Maintenance of Phosphagens. *By* STEPHEN F. FLAIM, MICHAEL BLUMENSTEIN, FRANKLIN C. CLAYTON, and RUTH R. INNERS 440

NMR Studies on a Renal Epithelial Cell Line: LLC-PK_1/Cl_4. *By* A. W. H. JANS, E. KELLENBACH, B. GRIEWEL, and R. K. H. KINNE 443

^{31}P NMR Evaluation of Rodent and Canine Myopathies. *By* Z. ARGOV, U. GIGER, Z. ROTH, M. KORUDA, J. S. LEIGH, and B. CHANCE 445

The Value of ^{31}P NMR in the Diagnosis and Monitoring the Course of Human Myopathies. *By* W. BANK, Z. ARGOV, J. S. LEIGH, and B. CHANCE 448

Fluorodeoxyglucose Brain Metabolism Studied by NMR and PET. *By* NICOLAS R. BOLO, KATHLEEN M. BRENNAN, REESE M. JONES, and THOMAS F. BUDINGER 451

Proton NMR Spectroscopic Studies of "Stunned" Myocardium. *By* W. T. EVANOCHKO, R. C. REEVES, R. C. CANBY, J. B. MCMILLIN, and G. M. POHOST 460

Physiological Application of ^{17}O Promoted Proton T_2 Relaxation. *By* AMOS L. HOPKINS, RICHARD G. BARR, and CLYDE B. BRATTON 463

A Comparison of Human Semen from Healthy, Subfertile, and Post-Vasectomy Donors by ^{31}P NMR Spectroscopy. *By* ADAM S. LEVINE, NATALIE FOSTER, and BARRY BEAN 466

Differentiation of Tumor from Non-malignant Human Tissue by Natural-Abundance ^{13}C NMR *in Vitro*. *By* KAREN R. HALLIDAY, CECILIA FENOGLIO-PREISER, and LAUREL O. SILLERUD 469

Insulin-Induced Effects on Glucose Metabolism by *Neurospora crassa* Studied Using ^{31}P Nuclear Magnetic Resonance. *By* N. J. GREENFIELD, M. MCKENZIE, S. FAWELL, F. ADEBODUN, F. JORDAN, and J. LENARD 471

The Levels of Phosphoethanolamine and Phosphocholine in Intact Neuroblastoma Cells: Effects of Cell Differentiation and of Exogenous Ethanolamine and Choline. *By* P. GLYNN, T. M. LEE, and S. OGAWA 474

How Does Acute or Chronic Volume Loading Affect Myocardial Bioenergetics? *By* MARY OSBAKKEN, LASZLO LIGETI, JOHN PIGOTT, MARIE YOUNG, JANOS HAMAR, MEIR SHINNER, HARI SUBRAMANIAN, JACK LEIGH, and BRITTON CHANCE 476

^{7}Li-NMR Study of Human Erythrocytes. *By* J. F. M. POST, K. PANCHALINGAM, G. WITHERS, D. E. WOESSNER, and J. W. PETTEGREW 480

Crafted Pulses For Imaging and *in Vivo* NMR Spectroscopy. *By* F. LOAIZA, M. A. MCCOY, W. S. WARREN, M. S. SILVER, and H. EGLOFF 483

Studies of Intracellular pH Regulation in Cultured Mammalian Cells by ^{31}P NMR. *By* BENJAMIN S. SZWERGOLD, JEROME J. FREED, and TRUMAN R. BROWN 488

A Non-invasive Study of Drug Metabolism in Patients as Studied by ^{19}F NMR Spectroscopy of 5-Fluorouracil. *By* WALTER WOLF, MICHAEL S. SILVER, MICHAEL J. ALBRIGHT, HORST WEBER, ULRICH REICHARDT, and ROLF SAUER 491

The Effect of Hypoglycemia on Brain Blood Flow and Brain Energy State During Neonatal Seizure. *By* RICHARD S. K. YOUNG, BARRETT E. COWAN, OGNEN A. C. PETROFF, RICHARD W. BRIGGS, and EDWARD NOVOTNY 494

Proton and Phosphorus NMR Studies of Traumatic Brain Injury in Rats. *By* ROBERT VINK, TRACY K. MCINTOSH, SUSAN E. FERNYAK, MICHAEL W. WEINER, and ALAN I. FADEN 497

Post-ischemic Mechanical Performance: Independence from ATP Levels. *By* STEVAN D. ZIMMER, ARTHUR H. L. FROM, JOHN E. FOKER, STEPHEN P.MICHURSKI, and KAMIL UGURBIL 501

^{1}H-NMR of Lactate by Homonuclear Transfer of Polarization. *By* M. VON KIENLIN, J. P. ALBRAND, B. AUTHIER, P. BLONDET, and M. DÉCORPS 504

The Relationship between the Proton Electrochemical Potential and Phosphate Potential in Rat Liver Mitochondria: Re-evaluation Using ^{31}P-NMR. *By* HAGAI ROTTENBERG 507

Diagnostic Markers of Experimental Pancreatitis: ^{31}P and ^{23}Na NMR Studies. *By* O. KAPLAN, T. KUSHNIR, and G. NAVON 510

The Fourier Series Window Method for Spatially Localized NMR Spectroscopy: Implementation with Composite Pulses and Multiple Coils. *By* MICHAEL GARWOOD, THOMAS SCHLEICH, and KAMIL UGURBIL 512

NMR as a Noninvasive Tool in Meat Research. *By* PETER LUNDBERG and HANS J. VOGEL 516

Uptake and Elimination of Isoflurane in Rabbit Tissue Studied with ^{19}F NMR Spectroscopy. *By* A. M. WYRWICZ, C. B. CONBOY, and P. H. EISELE 523

Use of Amplitude/Frequency Modulated Pulses To Conduct Phase-Modulated Rotating Frame Experiments. *By* MICHAEL GARWOOD and KAMIL UGURBIL 527

NMR Studies of Intracellular Water: Use of the Amphibian Oocyte as a Model System. *By* G. A. MORRILL, A. B. KOSTELLOW, D. HOFFMAN, and R. K. GUPTA 531
